Good morning,

I'm pleased to introduce the first edition of our BHF Company Newsletter, which we'll be sharing periodically throughout the year. This newsletter is designed to keep you informed on the latest at BHF, including company updates, new products and systems, industry events, and more.

We hope you enjoy this update on our ongoing efforts and achievements.

As always, if you're looking for filtration or purification solutions, feel free to reach out by replying to this email.

I look forward to connecting with you soon.

Kind regards,
Stuart

MESSAGE FROM THE CEO

This year has brought its share of challenges as we navigate evolving economic conditions both in Australia and abroad. Through it all, we remain dedicated to delivering cost-effective solutions, fast turnaround times, and Australasia's most extensive selection of premium filtration and purification solutions and oenological additives.

In line with our commitment to performance and sustainability, we've completed several key projects. Notably, the recent commissioning of Toohey's wastewater reuse plant marked an exciting milestone, concluding a two-year journey and underscoring our focus on environmental responsibility. Stay tuned for more details on this achievement.

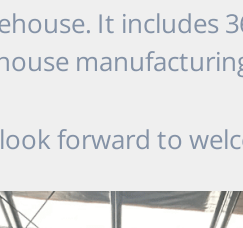

Earlier this month, we were honoured with nominations for two WISA awards: Winemaking & Oenology and Engineering & Hardware. These nominations reflect our dedication to industry excellence and innovation.

Please note that BHF will be closed over the holiday period from Friday, 20th December through Monday, 6th January. For any urgent matters during this time, please reach out to your Account Manager.

We sincerely thank you for your continued loyalty and look forward to working together in the new year.

Wayne Shub

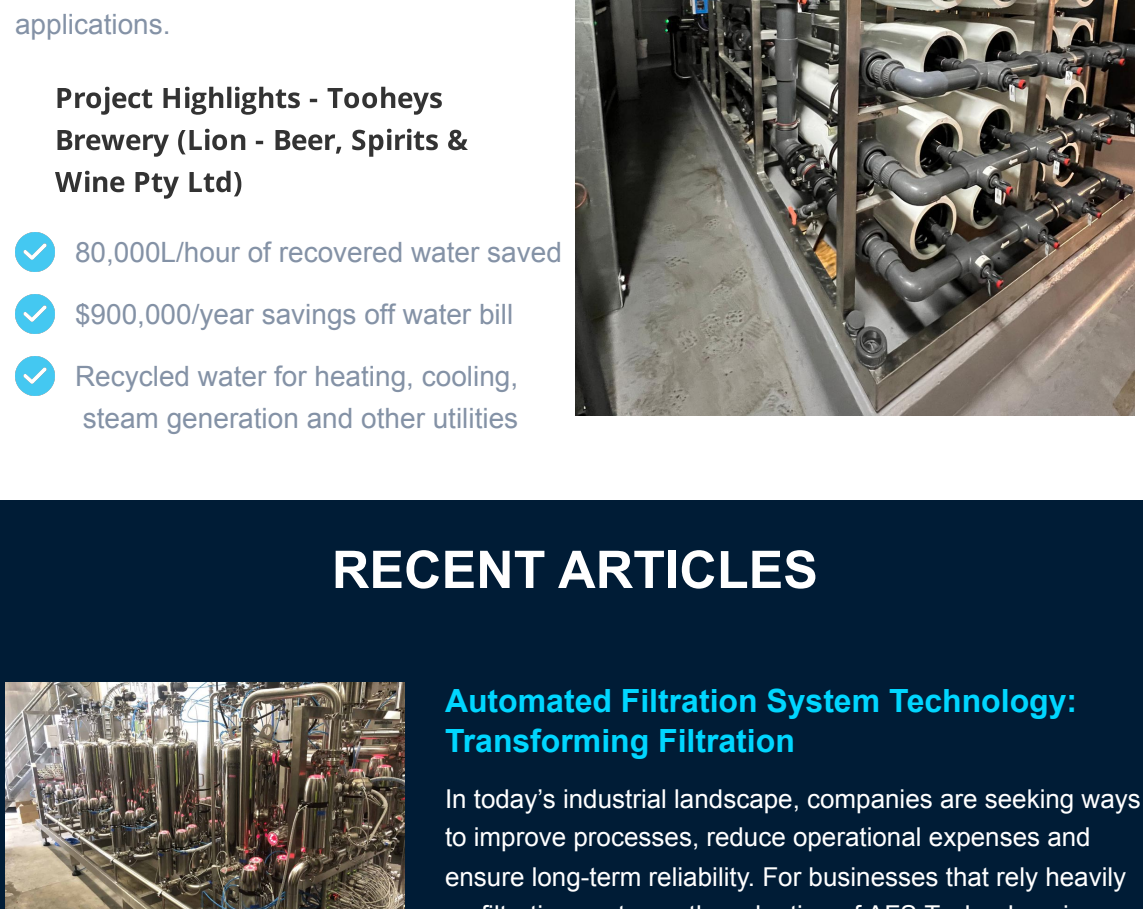

BHF Director

COMPANY NEWS

In August, we moved into our new office and warehouse facility in Oakleigh, Victoria. For those who have visited, you'll know this is a major milestone for our business, supporting our growth trajectory and enhancing our ability to serve you better. The new space offers expanded stockholding capacity, streamlined serviceability, and a dynamic work environment where our team can drive creativity, innovation, testing, and design. A standout feature of the facility is our cutting-edge, 1,000-square-meter warehouse. It includes 36 storage bays, dedicated service and maintenance areas, test beds, and in-house manufacturing, R&D, and pilot facilities.

For those who haven't visited yet, we look forward to welcoming you in the new year.

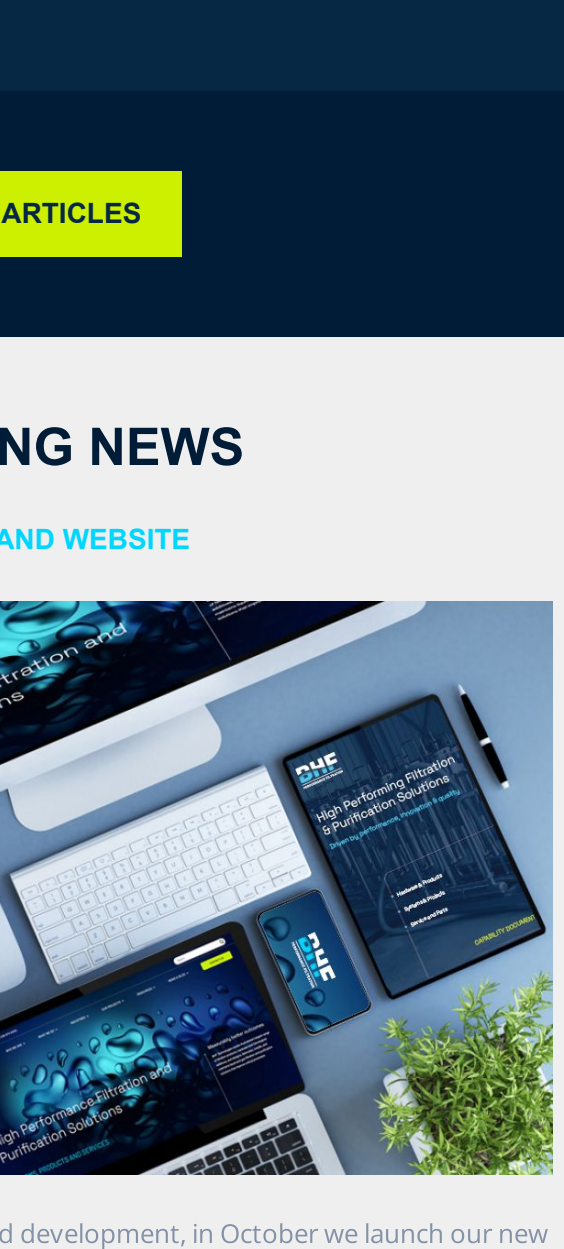

SUSTAINABLE SOLUTIONS

Early November, we completed a 2-year project to design, build and commission a high-recovery Reverse Osmosis system for advanced wastewater recovery. This fully automated system ensures seamless operation, cleaning and sanitisation to meet stringent customer standards, helping drive sustainable water reclamation in critical applications.

Project Highlights - Tooheys Brewery (Lion - Beer, Spirits & Wine Pty Ltd)

- 80,000L/hour of recovered water saved
- \$900,000/year savings off water bill
- Recycled water for heating, cooling, steam generation and other utilities

MARKETING NEWS

NEW BRAND AND WEBSITE

After many months of meticulous planning and development, in October we launch our new BHF brand and website. Our company has evolved tremendously over the years, and it was time for our brand to reflect our growth, our commitment and our bold vision for the future. We are proud to introduce BHF Technologies: where Performance Filtration meets innovation and sustainability.

This is more than just a rebrand; it's a powerful declaration of who we are and where we're going. We are dedicated to delivering unparalleled performance and sustainable outcomes for our clients, helping industries thrive with cutting-edge filtration and purification solutions. We invite you to explore our new website

LATEST BHF PROJECTS

Vinpac International – Angaston

Vinpac International enhanced its Angaston bottling line with a new filler and advanced filtration system, while addressing spatial constraints for essential wine filtration stages.

The project aimed to minimise downtime, reduce operator supervision, and uphold product quality. By implementing a flexible, automated filtration system with energy-efficient inline heating and cooling, it enhanced efficiency, safety, traceability, and reduced human error. This solution met operational needs and sustainability targets, delivering consistent product quality and optimal performance, even with schedule adjustments.

Suntory Beverage & Food Australia Pty Ltd

BHF were engaged through a tier-1 engineering company to provide high-end water treatment solutions for Australia's newest beverage manufacturing facility.

With a key focus on sustainability, we delivered a UF/RO with recovery systems to minimise wastage.

INDUSTRY EVENTS

8-10 October 2024

BioProcessing Network Conference

Our Victoria Account Manager Erika Guajardo attended the BioProcessing Network Conference in Brisbane. The event brought together leaders in bioprocessing, showcasing cutting-edge innovations and advancements that are shaping the future of the industry. We look forward to integrating these advancements into our work and continue driving progress in the field.

30 October -1 November 2024

ICN Ausbiotech Conference

Our ANZ Sales Manager Devan Wesley and Business Development and Operations Manager Stuart Thomson at the ICN Ausbiotech Conference in Melbourne. As Australia's largest life science conference and a leading international meeting place for the Australian life science community, it was an honour to attend on behalf of BHF.
